## **CAMPBELL + CAMPBELL** ARCHITECTS LANDSCAPE ARCHITECTS PLANNERS

CAMPBELL & CAMPBELL is a multidisciplinary site and environmental design and planning services corporation noted for excellence in integrated urban, architectural and landscape architectural design, emphasizing resilience, security and sustainability.

Critically acclaimed, this work has ranged from public projects noted for design processes involving large numbers of participants, through creative partnerships with clients, fellow scientific, planning, public policy and design professionals, and constituencies of cultural, academic and research institutions, environmental organizations and communities - collaboratively creating landmark works recognized as expressions of commitment to a sustainable future.

CAMPBELL & CAMPBELL has had the opportunity to work in the context of significant cultural and natural settings throughout the United States and abroad. Our work ranges from city and regional scale urban landscape infrastructure planning and design – transit systems, waterfronts, academic and research campuses, cultural destinations, museums, arboreta, and libraries – through parks, squares, plazas and works of public art to ecosystem remediation and interpretation in diverse landscapes in North America, Europe and Asia experiencing rapid socio/economic growth and unprecedented environmental change.

## **CAMPBELL & CAMPBELL** RESILIENT SYSTEMS DESIGN
